

Hepatitis C: State of Medicaid Access Report Card

Arizona

Grade	Recommendations to Improve Patient Access
B	<ul style="list-style-type: none"> Remove retreatment restriction. Ensure transparency and parity across FFS and MCOs regarding HCV coverage criteria. Remove additional restrictions as described below.

State Overview

As of February 2022, 2,169,228 individuals were enrolled in Medicaid and CHIP.¹ It is estimated that as of 2016, 61,500 people were living with HCV in Arizona.² Arizona Medicaid, also known as Arizona Health Care Cost Containment System (AHCCCS), contracts with seven managed care organizations (MCOs): Arizona Complete Health, Banner-University Family Care, Care1st Health Plan, Mercy Care, Molina Complete Care, Health Choice Arizona, and UnitedHealthcare Community Plan.³

The Arizona Medicaid Preferred Drug List includes Mavyret and sofosbuvir/velpatasvir.⁴

Deductions		Policy
Prior Authorization		Arizona Medicaid does not require prior authorization for preferred regimens. ⁵
Fibrosis Restrictions		Arizona Medicaid does not impose fibrosis restrictions for preferred regimens. ⁶
Substance Use Restrictions		Arizona Medicaid does not impose substance use restrictions for preferred regimens. ⁷
Prescriber Restrictions		Arizona Medicaid does not impose prescriber restrictions for preferred regimens. ⁸
Retreatment Restrictions	-8	Arizona Medicaid still appears to impose retreatment restrictions. Retreatment is not available when initial treatment fails as a result of non-adherence. ⁹
Access in Managed Care	-8	Care1st Health Plan, ¹⁰ Banner-University Family Care, ¹¹ and Health Choice Arizona ¹² have updated their formularies to indicate that prior authorization is no longer required for preferred drugs as of Oct. 1, 2022, but all three ¹³ still either list or link ¹⁴ to older criteria ¹⁵ that still appear to impose prior authorization requirements, including prescriber restrictions and additional restrictions. Arizona Complete Health, ¹⁶ Mercy Care, ¹⁷ Molina Complete Care, ¹⁸ and UnitedHealthcare ¹⁹ maintain prior authorization requirements for all regimens, including prescriber restrictions and additional restrictions. ²⁰ Additionally, Arizona Complete Health requires a 3-month sobriety period for anyone who “had a Substance Use Disorder in the past 12 months,” ²¹ while Mercy Care prohibits treatment if an individual has been engaged in “substance abuse activity” within the past three months and is not enrolled in a substance use treatment program. ²²
Additional Restrictions	-2	Arizona Medicaid imposes additional restrictions as follows: ²³ <ul style="list-style-type: none"> Appears to prohibit refills for lost or stolen medications absent good cause.
